Classification of missing values codes

Four separate missing value codes have been assigned consistently to all variables and used to differentiate the missing values of all data sets. The following counting was created with the stata version of the SUF. The missing labels differ in SPSS format.

Stata	SPSS	Value Label	Comment
.a	-1	Refusal	The respondent has refused to answer the question.
.b	-2	Do not know	The respondent replied with "Do not know".
.c	-3	Does not apply	The respondent was not asked this question because it did not fit the situation of this person for reasons of content (filtered).
.d	-4	Deleted during data editing	This value was coded as missing in the course of data edition by the FDZ-DZA or Infratest (e.g. due to inconsistency).
